

## **Brief Information For Miscellaneous Reliance Reforged Characters**

(by John Taber)

**Summary:** This is a brief summary of how I used these characters in my campaign. Maybe they will give you some ideas for your own games. ☺

- **Raven - Janice** is one of my all time favorite NPC. She is a vigilante superhero who is in love with one of the PC. GREAT foil.
- **Reactor** - Russian scientist who caused the Chernobyl incident to give himself superpowers. This NPC is a foil for a Survivor...a life loving superhero who strongly protects innocents.
- **Professor Odd** - Good magician who aids the PC from time to time.
- **ToyMaster and Dastardly Toys** - My attempt to make a normal who messes with superheroes. I never got to fully play with ToyMaster. His MO is to test the hero with several challenging before directly confronting them in a fashion similar to Arcade in the Marvel World.
- **Tree** - Force of nature who is found by the teens in the Graymalkin Institute (a school for young heroes).
