Hero Designer Templates For Spirit Storm

By John Taber

Summary

By using these templates Hero Designer 3.0 users can automatically apply all of the rule modifications used in the Spirit Storm campaign world and print out the results on custom character sheets. This should make creating Spirit Storm PC a breeze! ☺

Installation

To install these files simply create a directory under "My Documents" called "Spirit Storm Templates". Copy these files into that location. (Do NOT copy these files into the "Example Templates" directory under the Hero Designer folder structure.) When starting a new character select the option, "New Character (Custom/Non-Standard Rules)". Go to the "Spirit Storm Templates" folder and select the template you want to utilize. When selecting an Export Template simply select the one you want from the "Spirit Storm Templates" folder.

Here is a brief explanation of the files which are included in the package:

Filename	Description
Readme.pdf	This file.
SpritStorm.hde	Export template.
SpiritStormCampaignRules.hdr	Campaign rules.
SpiritStormLogo.jpg	Logo used in Spirit Storm export template.
SpiritStormTemplate.hdt	Main rules file. Works on top of main rules file.

Revision History

Revision	Date	Description
1.0	12/11/2008	First revision.
1.1	4/8/2009	Incorporated some cleanups to the above text from Don. No template changes at this time.
1.2	1/26/2010	Updated the templates with changes to Luck costing.
